EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Laura Majerus on 5/26/2005 for amendment of claims 2, 3, 5, 8, 9, 10, and 11 and on 7/05/2005 for amendments of claim 12 below.

The application has been amended as follows:

Please amend claims 2, 3, 5, 8, 9, 10, and 11 as follows ([] indicates deletions and underlines indicate additions:

2. (Currently Amended) [A] The computer-implemented method of claim 1, wherein computing the colimits of the hereditary diagram of diagrams comprises [for determining a colimit of a hereditary diagram, comprising]:

extracting the shape colimit of the hereditary diagram stored in a memory, the hereditary diagram including a plurality of diagrams;

bringing each of the plurality of diagrams in the hereditary diagram to the shape of the shape colimit to yield a plurality of extended diagrams in the memory; and

taking the colimit of the extended diagrams.

3. (Currently Amended) The method of claim [2] 1, further comprising: receiving from the user an indication to find the colimit of the hereditary diagram.

5. (Currently Amended) The method of claim [2] 1, further comprising: displaying a representation of the colimit on a display device.

8. (Currently Amended) The method of claim [2] 1, wherein the hereditary diagram includes types of the diagram elements.

9. (Currently Amended) The method of claim [2] 1, wherein the hereditary diagram includes morphisms between the diagram elements.

10. (Currently Amended) The method of claim [2] 1, wherein the hereditary diagram is displayed with indicators on its arcs indicating what morphism is associated with the arcs.

11. (Currently Amended) The method of claim [2] 1, wherein the colimit of the hereditary diagram is displayed with indicators on its arcs indicating that the arcs constitute a cocone colimit.

Claim 12 – add the following to line 2 after the word “specification” but before the comma “,”:
“stored on a computer readable medium”.

Reasons for Allowance

2. Claims 1-12 are allowed.
3. The following is an examiner's statement of reasons for allowance:

While Specware ("Specware User's Guide", version 2.0.3) discloses a user interface for developing specifications for a system. Specware can be used to develop domain theories, develop code from specifications or develop specifications from code. However, Specware does not teach computing the colimits of the hereditary diagram of diagrams to compose larger software modules while preserving the decomposition of the involved components.

And Healy (article on "Colimits in Memory: Category Theory and Neural Systems") teaches co-limits in a particular category called Neural for deriving a neural system architecture using some general connectionist modeling principles. Healy does not teach automatically implementing a software specification or determining a colimit of the hereditary diagram of diagrams to compose a large software modules.

Neither of these references taken either alone or in combination discloses a method and device for automated software specification having all the claimed features of applicant's instant invention, specifically including: computing the colimits of the hereditary diagram of diagrams to compose larger software modules while preserving the decomposition of the involved components; and other limitations related to these features in combination with the remaining elements and features of the claimed invention. Also, there is no motivation to combine the Specware reference with the Healy reference to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

Art Unit: 2121
